# SCULPTA / 原尺寸接孔裝配修正版

## Arch54 + Barrel Vault / 40 分區 / 240 個 K 組 / 名義 CAD 裝配研究

採用原單元、00 直通 JOIN 與 06 可調 JOIN；原零件未縮放，排列與片數已更改。
Arch54：20 分區、368 片、184 個 00、164 個 06、100 個 K 組。
Barrel Vault：20 分區、560 片、280 個 00、260 個 06、140 個 K 組。

接法：側孔沿曲率方向接 06；同排兩片以 00 串接；每兩排通常形成 4 片 K 組。
圖上 K01、K02 等為分區內的組別。精確零件對照見 Cassette_Schedule.csv。
03_Rotary 為水路旋轉閥；本圖使用的彎折接頭為 06_Adjustable。

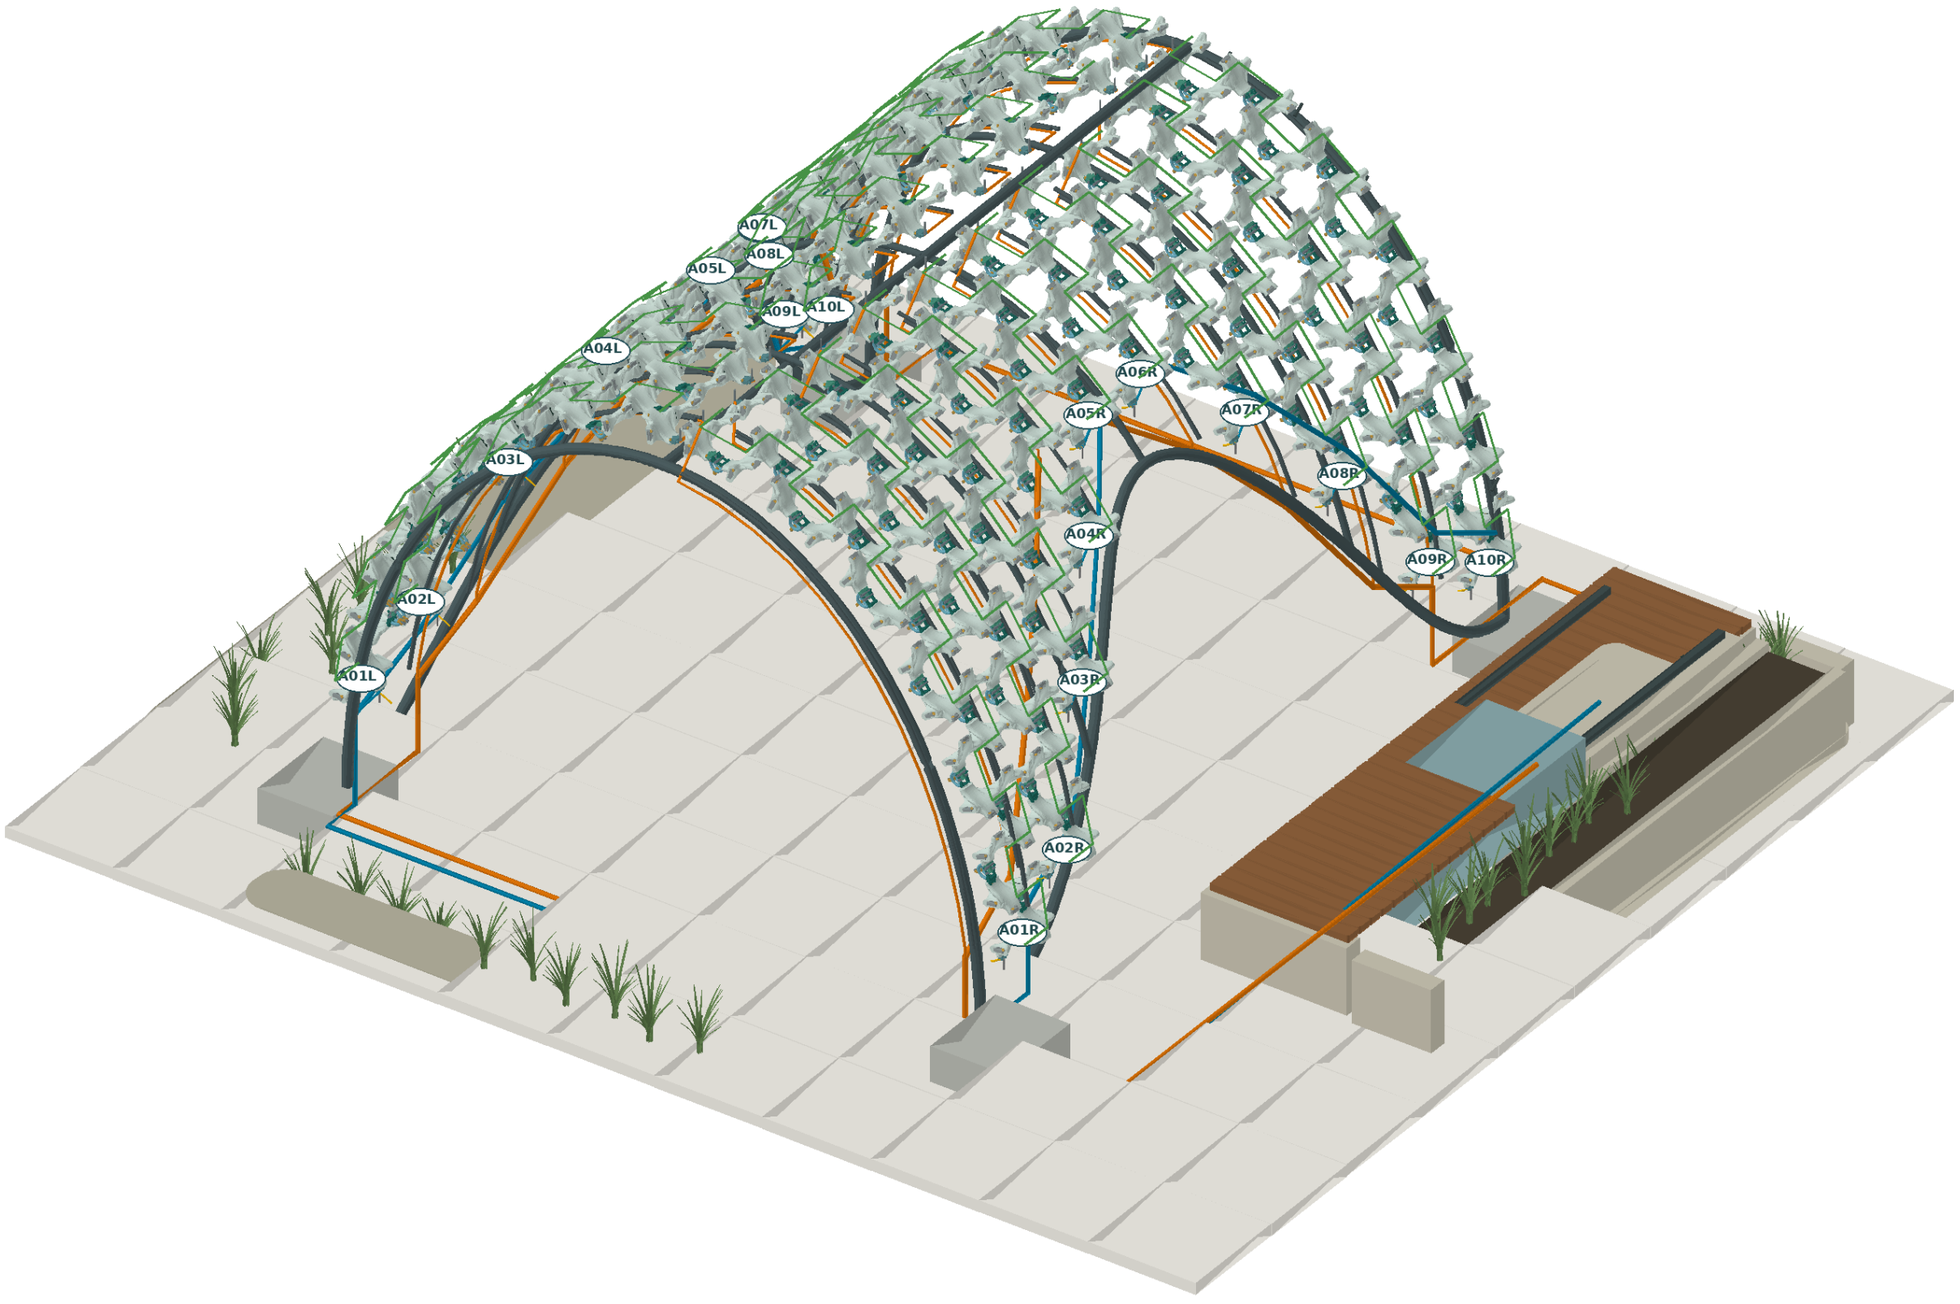

888 個單元間接頭已做雙孔名義對位檢核；全數 40 分區已確認拓樸連通。
頂點干涉篩查未出現深於 0.08 mm 的旗標；不等同完整碰撞或製造公差驗證。
對選定舊單元中心目標最大偏差：Arch54 100.08 mm；Barrel Vault 30.37 mm。

青色：供水；綠色：連通次序；橘色：回水；黃色：空氣位置；灰色：排氣與封閉件。
綠線是示意拓樸，未計算內腔流速或 CFD。分區圖的局部落管以整體總管配置為準。
配管、閥組、氣液處理、密封、支架固定及拆裝掃掠仍需詳細設計與實體試裝。
既有可調 JOIN 不是自封快拆。此圖冊不能直接當作可施工或可通水的完成圖。

閱讀順序：第 2-3 頁全景；第 4-23 頁 Arch54；第 24-43 頁 Barrel Vault；第 44 頁拆裝研究。
3dm 為完整原零件網格裝配；PNG 為簡化展示投影。所有模型尺寸以 mm 計。
詳細限制、來源與圖層說明見 README_ZH-TW.md。

# SCULPTA / ARCH54 / COMPLETE ZONE MAP

20 independent strip circuits / 368 original units / 100 cassette groups

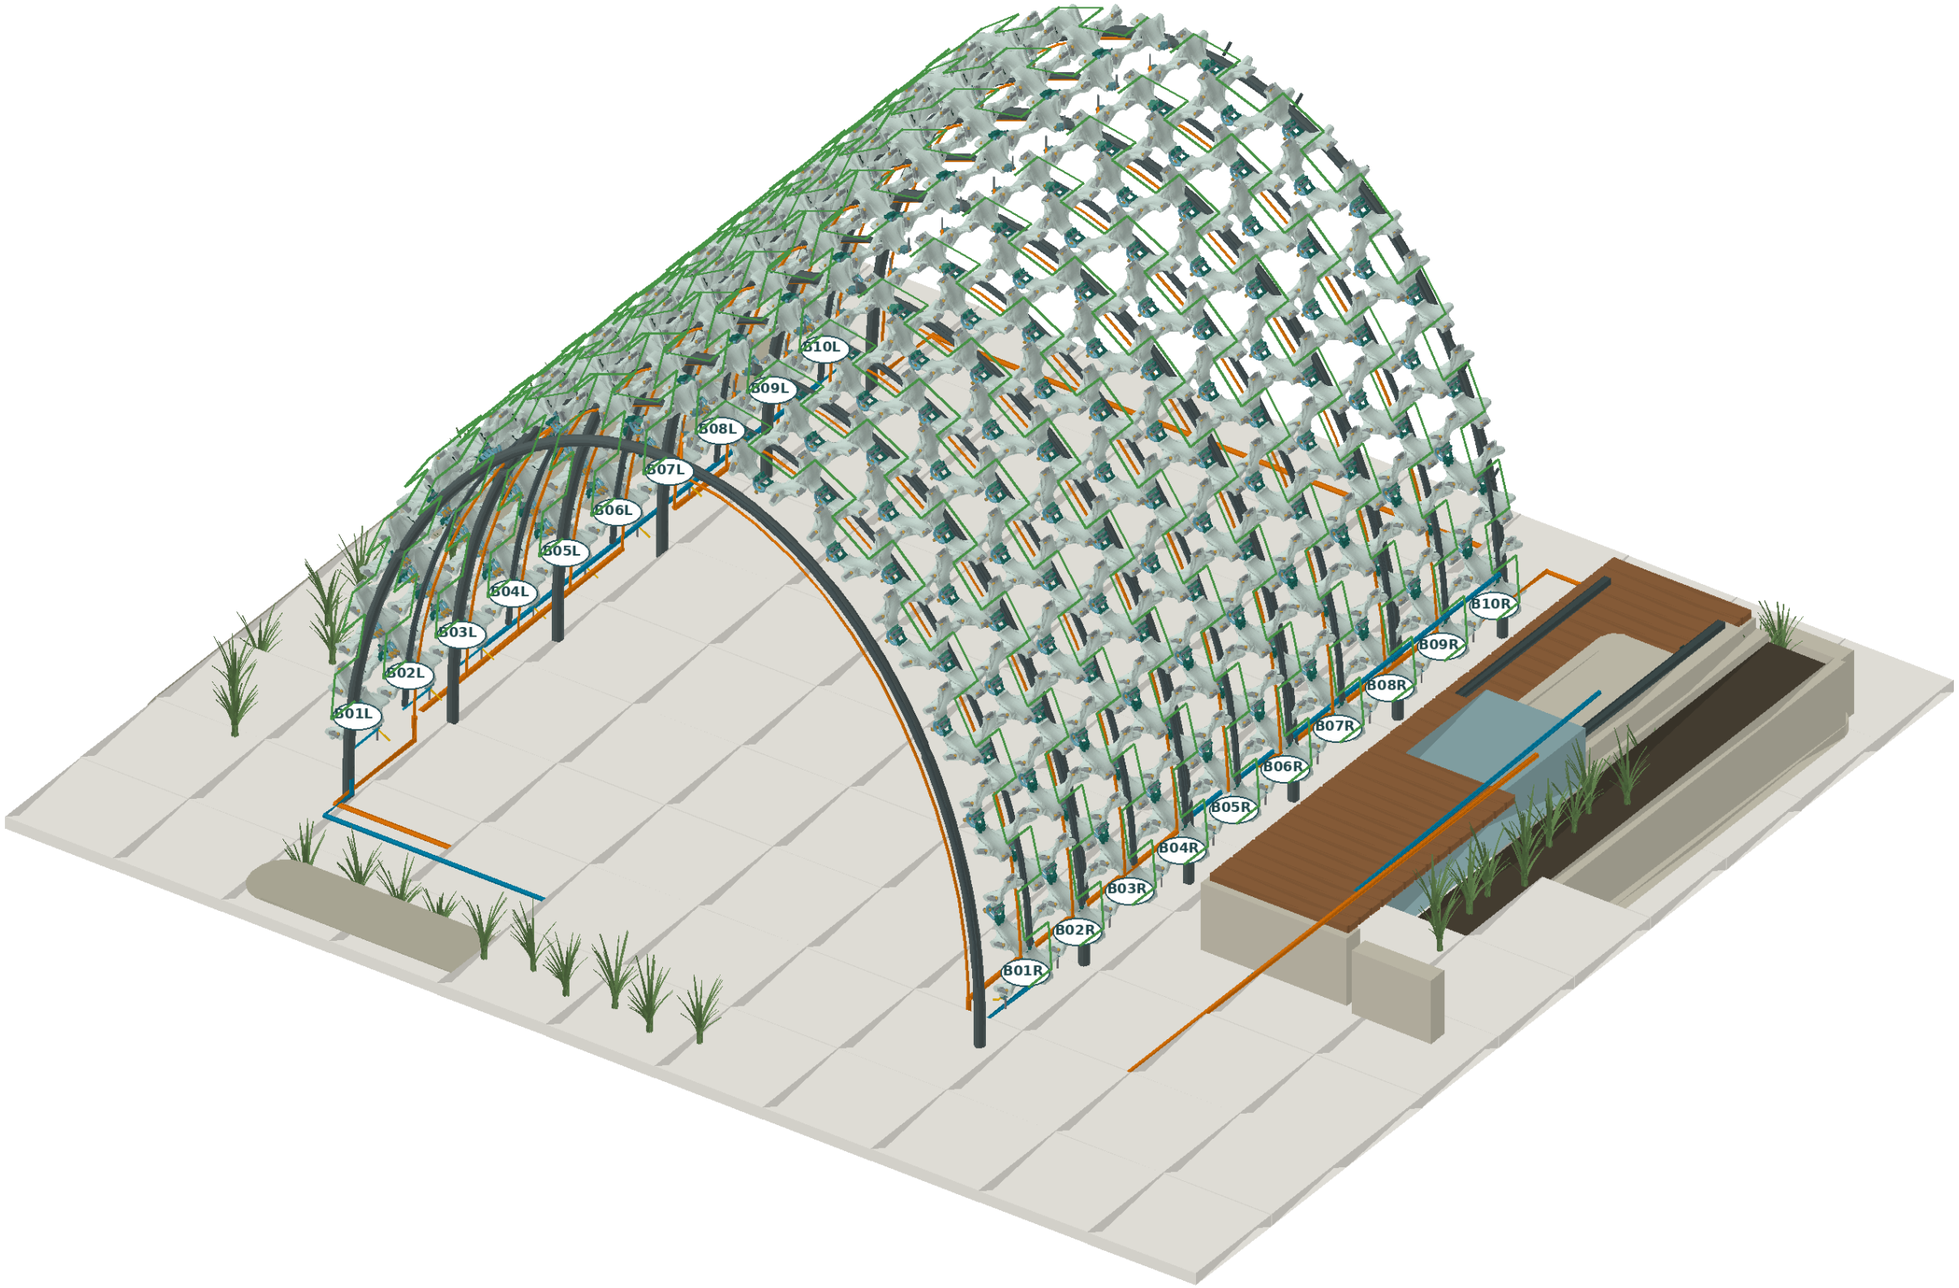

**Cyan supply / green circuit topology / orange return / yellow air / grey vent + closures**

Port-mated module CAD. Pipes, gas handling, frame attachments and landscape tank remain a coordination design.

# SCULPTA / BARREL VAULT / COMPLETE ZONE MAP

20 independent strip circuits / 560 original units / 140 cassette groups

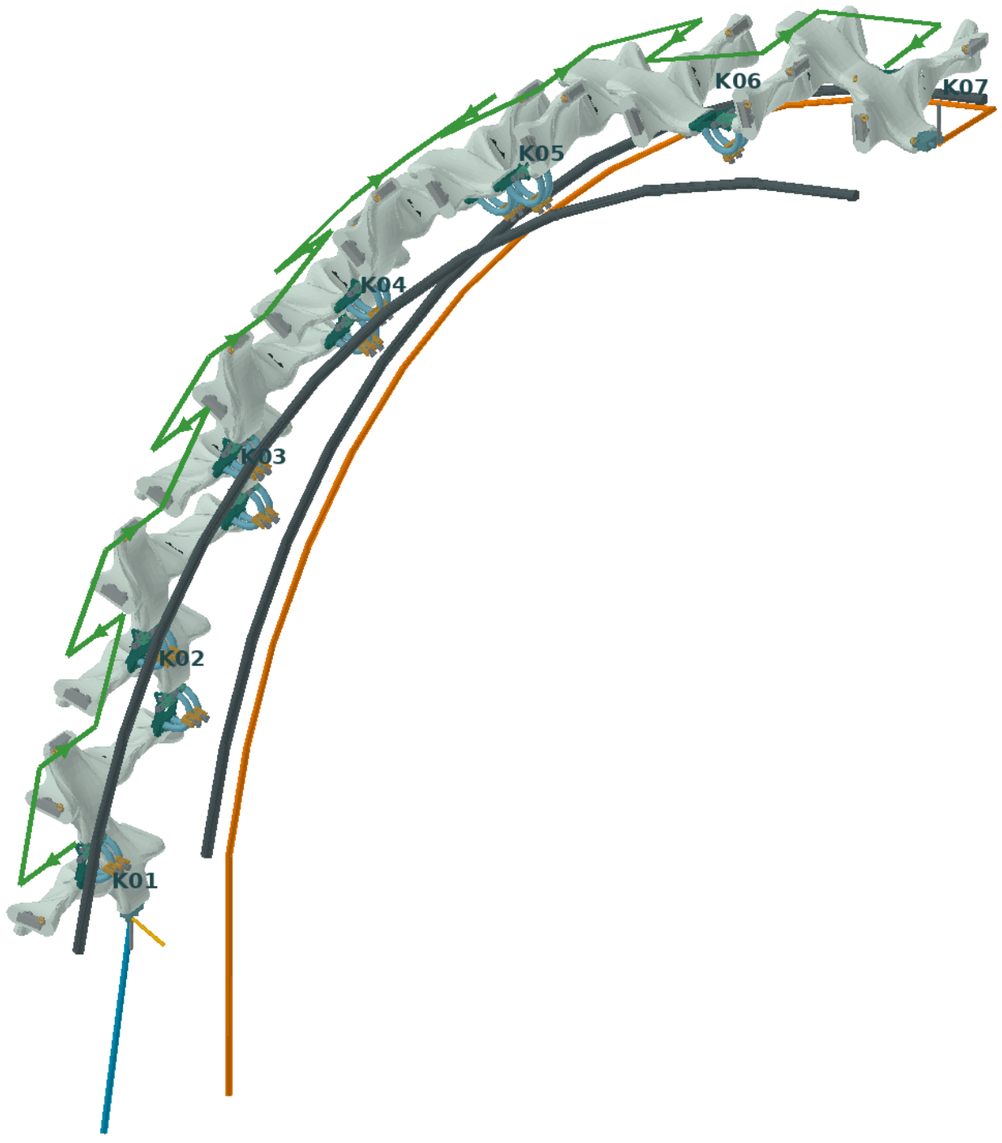

**Cyan supply / green circuit topology / orange return / yellow air / grey vent + closures**

Port-mated module CAD. Pipes, gas handling, frame attachments and landscape tank remain a coordination design.

# SCULPTA / ARCH54 / A01L

26 source units | 13 original 00 JOINs | 12 full-size adjustable JOINs | 7 cassettes

## EXACT NOMINAL CONNECTIONS

00: across each two-unit row
06: side-port bend between rows
No unit or JOIN scaling
Straight hinge mating span: 89.2 mm

## REPLACEMENT GROUPS

K01, K02 ...: normally four units
Final group may contain two units
Stop, isolate and drain the whole zone
Support cassette; release both boundaries

## CIRCUIT BOUNDARIES

Cyan: low feed / green: topology
Orange: separate return route
Yellow: air / grey: high vent + low drain
Unused module ports: new blind caps

## GEOMETRY CHECK

Max mating-centre residual: 0.000000 mm
Original-profile deviation: 15.7 mm
Hinge bend: -9.71 to -4.48 deg

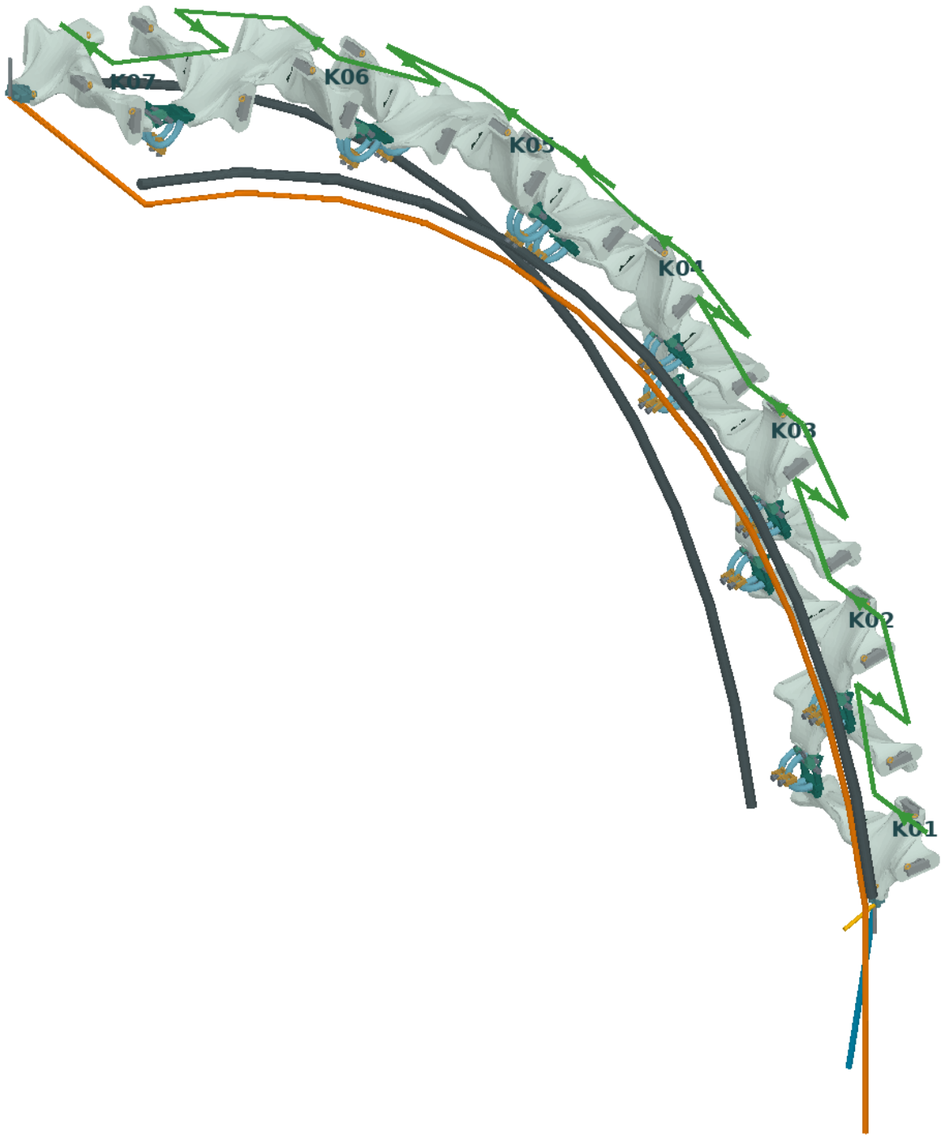

Limited vertex interference screen supplied

**Nominal CAD fit revision. Source shapes retained; count, orientation and spacing revised.**

Pipe/rail envelopes and intracavity green paths are coordination geometry. No CFD, seal or load certification.

# SCULPTA / ARCH54 / A01R

26 source units | 13 original 00 JOINs | 12 full-size adjustable JOINs | 7 cassettes

## EXACT NOMINAL CONNECTIONS

00: across each two-unit row

K01, K02 ...: normally four units
Final group may contain two units
Stop, isolate and drain the whole zone
Support cassette; release both boundaries

## CIRCUIT BOUNDARIES

Cyan: low feed / green: topology
Orange: separate return route
Yellow: air / grey: high vent + low drain
Unused module ports: new blind caps

## GEOMETRY CHECK

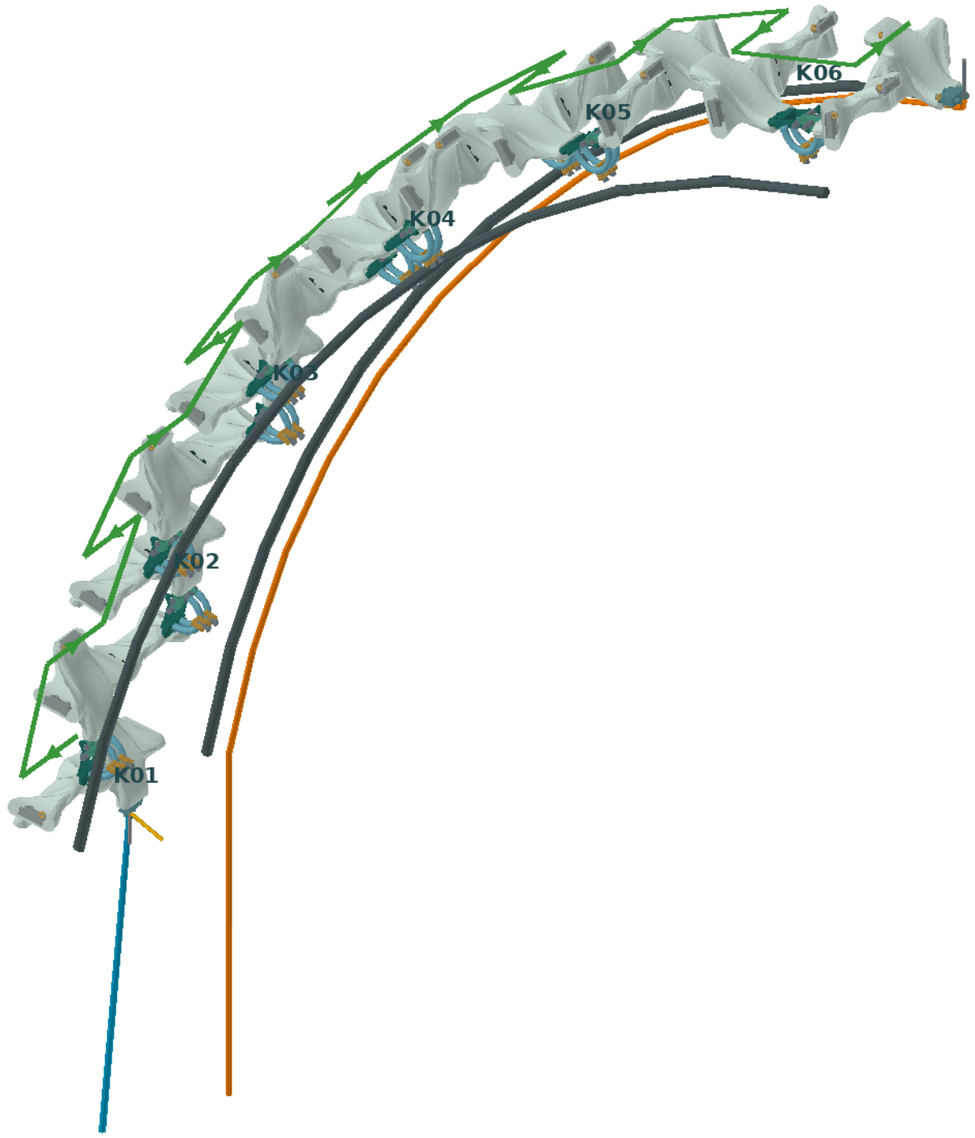

Max mating-centre residual: 0.000000 mm
Original-profile deviation: 30.4 mm
Hinge bend: -10.20 to -4.50 deg

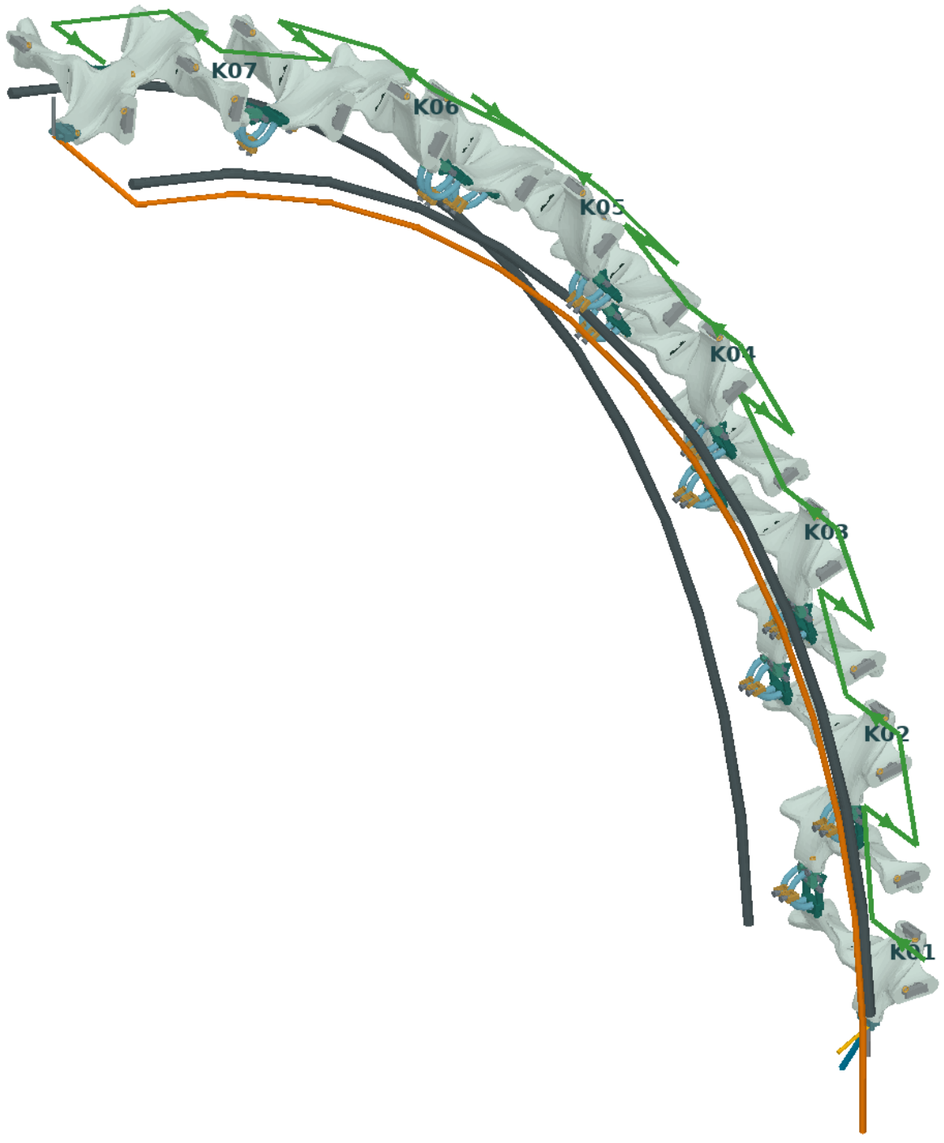

Limited vertex interference screen supplied

**Nominal CAD fit revision. Source shapes retained; count, orientation and spacing revised.**

Pipe/rail envelopes and intracavity green paths are coordination geometry. No CFD, seal or load certification.

# SCULPTA / BARREL VAULT / B04L

28 source units | 14 original 00 JOINs | 13 full-size adjustable JOINs | 7 cassettes

## EXACT NOMINAL CONNECTIONS

00: across each two-unit row
06: side-port bend between rows
No unit or JOIN scaling
Straight hinge mating span: 89.2 mm

## REPLACEMENT GROUPS

K01, K02 ...: normally four units
Final group may contain two units
Stop, isolate and drain the whole zone
Support cassette; release both boundaries

## CIRCUIT BOUNDARIES

Cyan: low feed / green: topology
Orange: separate return route
Yellow: air / grey: high vent + low drain
Unused module ports: new blind caps

## GEOMETRY CHECK

Max mating-centre residual: 0.000000 mm
Original-profile deviation: 30.4 mm
Hinge bend: -10.20 to -4.50 deg

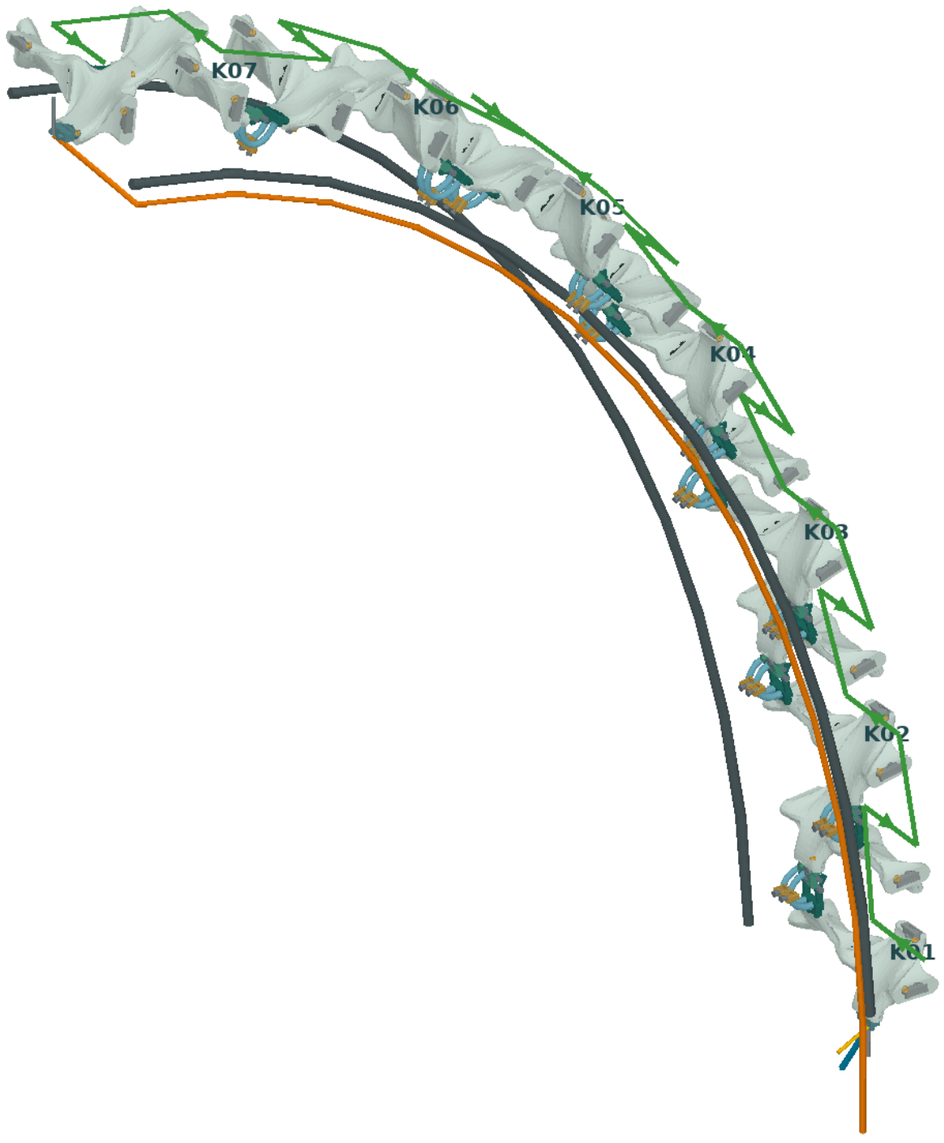

Limited vertex interference screen supplied

**Nominal CAD fit revision. Source shapes retained; count, orientation and spacing revised.**

# SCULPTA / FOUR-UNIT CASSETTE / DISASSEMBLY STUDY

**Existing hinge is not a self-sealing quick disconnect. Removal requires hose and mechanical disassembly.**

### 01 / ISOLATE + DRAIN

Stop the whole strip circuit.
Close supply, return and air.

### 02 / RELEASE BOUNDARIES

Support all four units.
Disconnect the flexible water links.
Release boundary pivot/locking hardware.

### 03 / REMOVE CASSETTE

Translate the supported unit group inward.
Fixed support rails remain.

### STATUS

Rigid exploded-position study only.
Removal sweep / brackets / tools
are not yet clearance-verified.
